

ERRICA NIANIAKOUDI-COHEN

Biologist · MSc Candidate in Molecular Biomedicine

Athens, Greece · erricanc@gmail.com · (+30) 694 002 6841 · [linkedin.com/in/errica-nianiakoudi-cohen](https://www.linkedin.com/in/errica-nianiakoudi-cohen)

PROFILE SUMMARY

Biologist and MSc candidate in Molecular Biomedicine with a strong foundation in biomedical research and hands-on laboratory experience in neurogenetics and translational autoimmunity research. Experienced in experimental planning, data analysis, scientific communication and collaborative laboratory work. Particularly interested in applying scientific knowledge beyond the laboratory and building a career within the pharmaceutical and biotechnology industry at the intersection of science, innovation and business. Eager to learn, contribute to industry projects and gain experience across different areas of the biopharmaceutical sector.

EDUCATION

MSc in Molecular Biomedicine · 120 ECTS

Medical School, NKUA, with BSRC 2025 – Present
“Alexander Fleming”

BSc in Biology · 240 ECTS

Department of Biology, Aristotle University of Thessaloniki 2021 – 2025

CORE COMPETENCIES

SCIENTIFIC & ANALYTICAL

Biomedical research · Scientific literature review · Data analysis & interpretation · Scientific communication · Presentation development

LABORATORY

Cell culture · RT-qPCR · Western blot · Flow cytometry · Immunofluorescence microscopy

DIGITAL & DATA

Python · R · Excel · PowerPoint · ImageJ / FIJI

PROFESSIONAL DEVELOPMENT

Johns Hopkins University, Whiting School of Engineering 2026 – present
Applied Generative AI and Agentic AI

Harvard Medical School 2023
Pro Courses: Clinical Drug Development and Novel Therapies for Chronic Inflammation

Harvard Medical School 2022
Fundamentals of Pharmacology and Fundamentals of Physiology

VOLUNTEERING

Quality Assurance Supervisor — International Biology Olympiad (IBO)
Vilnius University, Lithuania 07/2026

LANGUAGES

Greek — Mother tongue Native
English — Cambridge CAE C1
French — DELF B1

RESEARCH EXPERIENCE

Biomedical Research Foundation, Academy of Athens (BRFAA)

Master's Thesis Researcher — Dr D. Boumpas & Dr A. Banos 2026 – present

- Inflammation and autoimmunity research, experimental design, laboratory studies and data analysis.

BSRC “Alexander Fleming”

Research Intern — Laboratory of Dr Efthimios Skoulakis 2026

- Supported neurogenetics experiments and contributed to data collection and analysis.

“G. Papanikolaou” General Hospital of Thessaloniki — Gene & Cell Therapy

BSc Thesis Researcher — Dr N. Psatha & Dr E. Yannaki 2024 – 2025

- Preclinical gene therapy for Friedreich's ataxia using haematopoietic stem cells.
- Optimised therapeutic FXN expression *ex vivo* using lentiviral vectors and contributed to *in vivo* assessment of the approach.

AWARDS & SELECTED PRESENTATIONS

74th National Conference, Hellenic Society for Biochemistry & Molecular Biology — Poster 12/2024

Presentation Award

Exploring haematopoietic stem cells for therapeutic FXN expression in Friedreich's ataxia: a gene therapy approach

16th FELASA Congress 06/2025
Utilising haematopoietic stem cells for controlled FXN expression as gene therapy for Friedreich's ataxia

31st Biennial Meeting, ESN — HSN — Poster presenter 05/2025

Targeting Friedreich's ataxia: therapeutic FXN expression via haematopoietic stem cell-based gene therapy
